SUMMARY

Senior Software Engineer with 3.5+ years of experience building production-grade frontend systems at scale. Creator of open-source NPM libraries with **40,000+ weekly downloads** and an active contributor to widely-adopted React ecosystems - including Mantine, PrimeReact, and RSuite - collectively reaching **8.4M+ developers monthly**. Specialized in performance, accessibility, testing, and developer tooling.

EXPERIENCE

Senior Software Developer, Sears India

Mar 2023 – Present

- **Owned key frontend modules of a PCI-DSS compliant checkout system** powering gift card purchases on shopyourway.com — a no-login, ref-ID-validated React checkout handling credit card payments across saved and custom cards over 3+ years of continuous ownership.
- **Hardened checkout security and PCI compliance** by isolating card-data handling into a **sandboxed iframe** (separate React app) with secure parent-iframe messaging, **Subresource Integrity (SRI)** hash injection into HTML/CSP, and strict **Content Security Policies (CSP)** with report-uri telemetry — reducing **client-side attack exposure by ~80%** while improving security observability and checkout reliability.
- **Migrated payment processing** from a legacy in-house backend pipeline (Sharp) to **Stripe Elements**, offloading card validation, tokenization, and PCI scope to Stripe — increasing **payment success rates by ~12%**, reducing **checkout page load time by ~35%**, and replacing custom iframe/CSP infrastructure now handled natively by Stripe.
- **Architected an in-house React-Table library** from scratch — supporting priority-based sorting, multi-column filtering, virtualization, and full WCAG accessibility; achieved **90% test coverage** with CI/CD-automated deployment and Docusaurus-powered docs, now adopted by multiple teams company-wide.
- **Led real-time chat platform development** using Node.js and Socket.IO to replace a third-party vendor, partnering with support and product teams; delivered **55% faster issue resolution**, saved **\$30,000+ annually** in licensing costs, and earned the **Excellence Award** for measurable performance impact.
- **Integrated OpenAI streaming API** into the product with real-time AI responses, markdown rendering, request abortion, regeneration, and user feedback — shipping a reliable interactive UX from spec to production.
- Revamped the Wiki docs using **Next.js**, resulting in a blazing-fast, searchable documentation experience powered by **Static Site Generation (SSG)** and **Incremental builds**.
- **Built a no-code offers management platform** enabling vendors to create and schedule ad campaigns via Cron-based automation; now in active use by **3+ high-profile vendors**.

Web Developer, miniOrange

Jul 2022 – Nov 2022

- **Optimized WordPress SSO plugin bundle size** from 1.5 MB to 270 KB (a **~82% reduction**), driving a **70% increase** in plugin downloads.
- **Refactored React application** components and rendering logic to reduce load times and improve UX, while collaborating with senior designers on wireframes and **Figma** prototypes to improve visual consistency across the application.

OPEN-SOURCE CONTRIBUTIONS

- [Mantine](#) — Added a new tooltip feature with full test coverage, improving usability and accessibility. Used by **2.3M+ developers monthly**.
- [PrimeReact](#) — Fixed Sidebar re-rendering bug, improving performance and state handling. Used by **737K+ developers monthly**.
- [RSuite](#) — Introduced a *paused* prop in the Loader component for precise animation control. Used by **423K+ installations monthly**.
- [React-tooltip](#) — Improved component accessibility and added MDX docs in one of the most-used React tooltip libraries (**6M+ monthly users**). [See more →](#)

PROJECTS

React-Fast-Hooks | [NPM](#) | [GitHub](#) | [Docs](#)

- Published React hooks library simplifying complex state logic; **25,000+ weekly downloads** on NPM with adoption across the React community.

GitHub-CLI | [NPM](#) | [GitHub](#) | [Docs](#)

- Node.js CLI over GitHub API for repo, PR, and issue management from the terminal; **10,000+ weekly downloads** on NPM.

SKILLS

Languages & Frontend: JavaScript, TypeScript, React, Next.js, Redux, Zustand, HTML5, CSS3, SCSS, TailwindCSS, Styled Components, Framer Motion

Backend & Data: Node.js, Express, Socket.IO, REST APIs, JWT, MongoDB, MySQL, Redis, Mongoose

Testing, Tooling & DevOps: Jest, React Testing Library, SuperTest, Webpack, Rollup, Docusaurus, Lighthouse, Git, GitHub Actions, CI/CD, NPM publishing, Figma

EDUCATION

P.E.S. Modern College of Engineering, Pune — B.E. Computer Engineering, CGPA 9.05 / 10

2018 – 2022
